

Our services

Elvexys is an IT company with more than 35 years experience in industrial IT. As experts in data conversion and transport on industrial protocols, such as Modbus, Siemens S7, SAIA SBUS, IEC 60870-5-104 or IEC 61850, we can ensure the deployment of private LoRaWAN[®] infrastructures on an industrial site or city scale. To do this, we have developed the following range of services:
